About Me

I studied **Applied Information Science** at **PXL University College** and currently work as a **full-stack .NET developer**, with a strong liking for **frontend development**. I'm always looking to grow as a developer, and I have a special interest in topics like **DevOps** and **software architecture**.

Something I truly enjoy is **mentoring**. Whether I'm supporting colleagues or guiding interns, I find it rewarding to share knowledge and help others develop their skills.

I love learning and growing together with others.
